# Bleeding green

ECM2434 Group Software Engineering Project

Submission 1 presentation

App Design in figma

•   Figma allowed us to quickly put our design ideas into a virtual space meaning we would have a basic design model to present and then use to build off.

Features of the figma design:

• Colour scheme: Exeter colour's

• 1 main page which everything is accessed off

• Every button works how we intend the real thing to

• Working pop ups and drop downs

https://www.figma.com/proto/VoVomx3O1N2ei0j2o5ivpE/Main?page-id=73%3A3&node-id=87%3A68&viewport=443%2C260%2C0.37&scaling=scale-down&starting-point-node-id=87%3A68

Where are we at now ?

- Hours spent in group meetings so far: 25

- Design ideas (100 %)

- Wire frame (100 %)

- Front end progress (xyz %) – Development started: 21/02/2023

- Documentation relative to project (Up to date)

- Database design (100 %)

- Backend (xyz %) – Development started: 1/03/2023

- Testing (n/a)

How we will be ready for the final deadline

3 key areas:

• Backend completion: 50 combined hours

• Documentation completion: 10 combined hours

• Testing completion: 25 combined hours

Current rate: 8 Hours pppw together

           Circa 6 Hours pppw individual
